

# NEOTEARS

(Hypromellose + Dextran 70)  
Sterile Lubricant Eye Drops

نیو تیرز  
ہائپر و میلووز  
ڈیکسٹران 70

## DESCRIPTION:

Hypromellose is used as a thickening agent to the vehicles for eye drops and artificial tear solution. Dextran-70 is also an ingredient of artificial tears and it is used in eye drops as a lubricant.

## COMPOSITION:

Each ml contains:

Hypromellose (Hydroxypropyl methylcellulose) . . . . . 3.0 mg

Dextran70 . . . . . 1.0 mg

(Vega's specs)

**Preservative:** Sodium perborate

**Therapeutic class:**

Eye Lubricant

## INDICATIONS AND USAGE:

For the temporary relief of burning and irritation due to dryness of the eye and for use as a protectant against further irritation. For the temporary relief of discomfort due to minor irritations of the eye or to exposure to wind or sun.

## WARNINGS:

**For Ophthalmic use only:**

If you experience eye pain, changes in vision, continued redness or irritation of the eyes, or if the condition worsens or persists for more than 72 hours, discontinue the use and consult the physician. If you have glaucoma, do not use this product except under the advice and supervision of a physician. Overuse of this product may produce increased redness of the eyes. All contact lens wearers must see their eye care professional as directed. If your lenses are for extended wear, your eye care professional may prescribe more frequent visits. If solution changes color or becomes cloudy, do not use. To avoid contamination, do not touch tip of the container to any surface. Replace cap after using.

## PREGNANCY AND LACTATION:

If you are pregnant or nursing a baby, seek the advice of a health professional before using the product.

## ADVERSE REACTIONS:

Eye stinging.  
Excessive watering (tearing) of the eyes.  
Unusual eye secretions.  
Blurred vision.

## DOSAGE:

Instill one or two drops in the affected eye(s) or as described by the physician.

## ADMINISTRATION:

- Follow these steps to put in eye drops correctly:
- Wash your hands with soap and water.
- Rinse and dry your hands.

- If the eye drops are cloudy, gently shake the bottle well before using them.
- Make sure there are no chips or cracks at the end of the eye dropper.
- Hold the dropper tip down all the time.
- This stops the drops from flowing back into the bulb where there may be germs that can get into the medicine.
- The eye drops must be kept clean. Avoid touching the dropper against the eye or anything else.
- Lie down or tilt your head back.
- If you are giving the drops to someone else, have them lie down or tilt back their head.
- With your index (pointer) finger, pull down the lower lid of your eye to form a pocket.
- Hold the dispenser close to your eye with the opposite hand.
- Brace (hold) the remaining fingers of this hand against your nose or cheek to prevent shaking.
- Drop the correct number of drops (wait about 1 minute between each drop) into the pocket made between your lower lid and eyeball.
- Do not squeeze the bulb too hard. Placing drops on the surface of the eyeball (cornea) may cause stinging.
- If you are giving the drops to someone else, follow the same steps.
- Replace the cap or dropper in the medicine bottle right away.
- Do not rinse or wipe it off.
- Gently close your eyes.
- Press your index finger against the inside corner of your eye next to your nose for 1 minute.
- This allows the medicine to start working in the eye.
- Help the person you have given the drops to do this.
- Gently wipe away any extra liquid with a tissue.
- Do not rub your eyes.
- If you have given the drops to someone else, do not let them rub their eyes.
- Wash your hands to remove any medicine.
- If you are using more than one type of eye drop medicine, wait before using the next type.
- You should wait 10 to 15 minutes before using the next type of eye drops.
- Apply the missed dose as soon as possible.
- Skip the missed dose if it is almost time for your next regular dose.
- Do not double the dose to catch up.

## PRECAUTIONS:

Keep container tightly closed when not in use. Use before the expiry date marked on the container. Keep out of the reach of children.

## STORAGE:

Store below 30°C.

Protect from heat and sunlight.

Use within 4 weeks after first opening the bottle.

## PRESENTATION:

NEO TEARS lubricant eye drops is supplied in 15 ml sterile plastic dropper bottle.

Manufactured by:

**Vega Pharmaceuticals (Pvt.) Ltd.**

30 Km, Multan Road, Lahore, Pakistan.

خوراک: ڈاکٹر کی ہدایت کے مطابق استعمال کریں۔

ہدایت: دھوپ اور گرمی سے بچائیں۔ بچوں کی پہنچ سے دور رکھیں۔

۳۰ ڈگری سینٹی گریڈ سے کم درجہ حرارت پر رکھیں۔

پکلی دفعہ یوزل کھولنے کے بعد دو کو چار ہفتوں تک استعمال کیا جاسکتا ہے۔
